

TEAM-D (Transsektorale MTB-Plattform Deutschland)

Transsektorale Austauschplattform für wiederkehrende Fragestellungen in deutschen Molekularen Tumorboards

STUDY TYPE	
PROJECT LEAD	<p>Dr. Alexander Desuki Universitäres Centrum für Tumorerkrankungen (UCT) der Universitätsmedizin der Johannes Gutenberg-Universität Mainz Langenbeckstr. 1 55131 Mainz alexander.desuki@unimedizin-mainz.de</p> <p>Dr. Sebastian Lange Comprehensive Cancer Center München^{TUM} Klinikum rechts der Isar der TU München Ismaninger Straße 22 81675 München sebastian.lange@tum.de</p> <p>Dr. Ina Pretzell Westdeutsches Tumorzentrum (WTZ) Universitätsklinikum Essen Hufelandstr. 55 45147 Essen ina.pretzell@uk-essen.de</p>
CONDITION	Recurring questions in precision oncology of advanced tumors after comprehensive molecular profiling
DESIGN	Transsectoral exchange platform
OBJECTIVE(S)	<ul style="list-style-type: none"> - Harmonization of precision oncology in Germany - A platform for consensus building - Visibility through published articles on each topic - Collection and publication of case reports building clinical evidence for future cases - Educational event
INTERVENTION(S)	n/a
BACKGROUND/RATIONALE	<p>While extensive organizational structure exchange exists in German precision oncology, transregional and transsectoral exchange concerning specific findings and constellations could be further improved.</p> <p>We propose establishing a personal exchange platform involving physicians and scientists involved in German Molecular Tumor Boards to discuss frequently recurring and relevant alterations regarding their therapeutical consequences. Discussions and opinions, as well as potential common recommendations and case reports of patients treated at the cooperating sites will be collected,</p>

	<p>evaluated, and published to improve and/or generate further evidence. The main focus will be on peer discussion of specific constellations of alterations, specific individual cases will not be discussed to avoid interference with regular local MTBs.</p> <p>Major goals:</p> <ol style="list-style-type: none"> 1. Peer Discussion to exchange experiences and opinions 2. Overview of the current treatment landscape in German MTBs 3. Generating further evidence via Case reports/series from specific constellations 4. Consensus statement concerning specific molecular alterations <p>Results:</p> <ol style="list-style-type: none"> 1. Structured processing of treatment cases 2. Publication including opinions, consensus, and case reports/series
COLLECTED DATA	<ul style="list-style-type: none"> - Summaries of discussions and opinion-building across the group - Individual case reports concerning the general topic discussed
SAMPLE SIZE	Not applicable
DURATION	<p>Consecutive project without ending time point</p> <p>Frequent meetings every 1-2 months</p>
PARTICIPATING CENTERS	> 10, not limited
FURTHER CENTERS DESIRED?	yes
NUMBER of PATIENTS	Not applicable
CURRENT NUMBER of PATIENTS	Not applicable
